

ABSTRACT

[0077] A user interface includes a main screen segregated into various screen areas. At least one of the screen areas is devoted to a system application for displaying status icons, and another of the screen areas is devoted to an interface page which may or may not link to other interface pages which are used for displaying current or recent application information for respective user applications, which user applications may be accessed through interaction with the interface page. The application information may be application status information, recent communication messages (such as e-mail messages, SMS messages, or instant messaging messages) and/or one or more upcoming events or to do items for a user. The user interaction may occur through selection with a pointing device such as a stylus, a fingertip stylus, a finger, or one or more buttons, or even through voice commands. The user interface may also include an area reserved for displaying advertisements.
